

Safety First:

A cornerstone of our Core Values

PEC President and CEO, Jim Bisson Jr. presenting the keys to the PEC Safety Van to Director of Safety & Compliance, Brian Ferreira. This is the first such Safety Van in the Commercial Electrical Construction industry, if not the overall construction industry in the Northeast.

The Safety Van program was launched for the specific purpose of bringing PEC's Safety Training and Classroom programs directly to the job sites. This van will allow Brian Ferreira to address specific work site safety issues as well as overall continuing Safety and Training Education for PEC's Field Associates. The Safety Van is designed to make all who see it aware of Professional Electrical Contractors unwavering commitment to "Stay Safe" and adherence to Safety First.

Professional Electrical Contractors of CT, Inc.
